June 22, 2018

Dear Water Testing Program Participant,

We would like to thank you for participating in the recent drinking water testing opportunity arranged by the Juneau County Land and Water Resources Department and the Juneau County Health Department.

Enclosed you will find a copy of your water test results along with interpretive information to help you better understand your individual well water quality. We wanted to make sure you had a copy of your test result as soon as possible. As part of the testing opportunity, we have also arranged an educational event for those households that had water tested.

You are encouraged to attend the educational program:

When: Thursday, June 25 @ 6-7:30PM

Where: Necedah Town Hall, 101 Center St, Necedah, WI 54646.

Having the opportunity to attend the educational event is an additional benefit to you for your participation in this testing program. While you are not required to attend, many participants find the presentation to be extremely useful at better understanding their well water quality. The presentation is designed to answer questions that you might have about your individual results and how to improve water quality if you have detected any issues. We will also provide an overview of groundwater quality in your area based on what was learned through this testing opportunity.

If you have any questions about your results or questions regarding additional well water concerns please do not hesitate to contact one of us. We hope to see you at this educational event.

Sincerely,

Kevin Masarik
Groundwater Education Specialist
UW-Extension
